

# MIQUEL GÓMEZ CORRAL

## Junior AI Automation Engineer

Computer engineer specialized in Artificial Intelligence and Machine Learning. During my Bachelor's and Master's in AI (UPV), I have worked on optimization, machine learning, computer vision, and language models (LLMs), developing projects ranging from data pipelines and digital imaging to agents and RAG systems.

I have applied this knowledge in several companies in the sector, automating processes and integrating AI solutions that deliver real value, proving the strength of my education.

Currently, I seek to continue growing as an engineer in the AI and Machine Learning sector, where I can contribute and learn to the fullest.

## EXPERIENCE

|                                        |                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Valencia, Spain<br>Dec 2025 – Present  | <b>AI Automation Engineer Solver</b><br>At <b>Vidext</b> , I returned as an expert in <b>automation</b> and artificial intelligence, developing <b>pipelines</b> and processes that allow the company to automate tasks and processes, saving time and money. At the same time, I contribute my AI knowledge to improve the company's processes and develop new solutions. |
| Valencia, Spain<br>Jan 2025 – Dec 2025 | <b>AI Engineer Solver</b><br>At <b>Solver</b> , as an AI engineer, I studied the needs and data of the company's clients, developing <b>AI models</b> and researching <b>technologies</b> the company requires.                                                                                                                                                            |
| Valencia, Spain<br>Jun 2024 – Sep 2024 | <b>University Internship 2: Vidext</b><br>At <b>Vidext</b> , I learned to develop web applications using <b>React</b> and <b>Next.js</b> . I built the company's landing page and an internal application for employee use.                                                                                                                                                |
| Valencia, Spain<br>Sep 2022 – Mar 2023 | <b>University Internship 1: Lāberit Sistemas</b><br>During this internship I learned to manage and develop extensions for Microsoft's ERP "Navision".                                                                                                                                                                                                                      |
| Almenara, Spain<br>Jan 2022 – Jun 2024 | <b>Image Editor, Freelance: Fiverr</b><br>On this platform I offered my <b>image editing skills</b> to clients worldwide.                                                                                                                                                                                                                                                  |
| Almenara, Spain<br>Jun 2021 – Jun 2024 | <b>Other: Tutor, Waiter and Kitchen Assistant...</b><br>During my student years I worked in various roles to support my family and gain professional experience.                                                                                                                                                                                                           |

## ENVIRONMENTS & TECHNOLOGIES

**Languages:** Python | TypeScript | JavaScript | Java | C | C++ | C# | SQL | RISC-V | Haskell.  
**AI / Machine Learning:** PyTorch | Transformers (HuggingFace) | Scikit-learn | LangChain/LangGraph | OpenCV | Reinforcement Learning | RAG | Fine-tuning | Agents (MCP, tool-use) ...  
**Data / Backend:** Pandas | NumPy | Matplotlib | Plotly | FastAPI...  
**Web Development:** React | Next.js | Tailwind | Zustand...  
**Environments / DevOps:** Docker | Git | Linux | Unity.  
**Certification:** [HuggingFace — Deep Reinforcement Learning Course](#).

## SKILLS

- Open to teamwork.
- Leadership capacity.
- Eager to learn and grow in my IT career.
- Problem-solving and analytical skills.
- Personal projects and continuous learning on my own time.
- B1 driving licence and own vehicle.

## ACHIEVEMENTS

- Best academic record award in my cohort for the 2022–23 academic year.
- ARA distinction (High Academic Performance) on my Bachelor's degree.
- +20 honours distinctions in my Bachelor's and Master's degrees.
- Honours mention for the Bachelor's thesis (TFG).

## LANGUAGES

**Spanish & Valencian**  
Native.

**English**  
B2 – Cambridge Certified.

## ADOBE TOOLS

- Photoshop (Images)
- Premier (Video)
